WORK EXPERIENCE

BrandSafway

Aug. 2024 – Present

Senior Project Controls Analyst

Remote

- Driving cross-functional program initiatives by automating cost forecasting and labor reporting across 20+ sites, cutting reporting cycles from days to real-time and enabling faster decision-making.
- Standardizing material and labor tracking processes in Power BI and Excel, supporting financial objectives across multi-site operations.
- Automating invoice reconciliation with VBA, saving 400+ work hours annually.
- Designing an Excel-based rate-adjustment model that supports accurate revenue forecasting and pricing visibility.
- Introducing a Power Apps + SharePoint savings tracker with QR codes, encouraging greater employee participation and uncovering new opportunities for cost savings.
- Optimizing workflows in Draw.io, helping teams across 10+ sites reducing operational inefficiencies.
- Delivering SQL-powered Power BI dashboards to 20+ locations to access actionable data for decision-making.
- Streamlining labor reporting using Power Query ETL, cutting down manual effort while improving accuracy.

Lucid Motors

May 2024 – Aug. 2024

Project Management Intern

Newark, CA

- Streamlined program documentation and materials planning workflows in Smartsheet and Confluence, supporting 200+ stakeholders with improved project visibility and reduced errors.
- Built automated Smartsheet trackers with email alerts, enabling faster reporting cycles and reducing errors.

Shantilal & Co.

Oct. 2020 – Jul. 2023

Business Intelligence and Supply Chain Analyst

Vijayawada, India

- Improved medicine delivery routes by optimizing logistics, which shortened supply times and increased reliability.
- Developed a debt collection strategy with client risk scoring, strengthening cash flow and lowering defaults.
- Developed material supply and inventory management strategies, ensuring product availability while reducing excess stock, which supported a 2x increase in turnover within 3 years.
- Partnered with suppliers and procurement teams to improve lead times by 20%, strengthening supply chain resilience and cost efficiency.
- Integrated ERP data into Power BI, enabling real-time monitoring of receivables and reducing delayed payments.
- Improved supplier lead time with proactive scheduling and demand analysis, strengthening supply chain resilience.
- Applied k-means clustering for customer segmentation, allowing more targeted marketing and boosting retention.
- Maintained compliance with pharma pricing regulations, protecting margins and reducing regulatory risk.
